Ensures Health Gut, Healthy Life...

Probiotics are believed to play in very important role in regulating intestinal function & digestion by balancing intestinal microflora. Probiotics promote mental flexibility and alleviate stress in healthy older adults, along with causing changes in gut microbiota. Bifidobacterium and lactobacillus are "friendly bacteria" to maintain a healthy digestive tract (stomach and intestines).

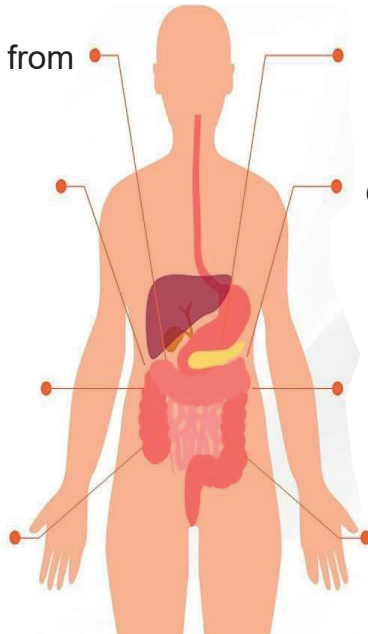

Probiotics are well-known as “health friendly bacteria”, which exhibit various health beneficial properties such as

May help remove mucus from the walls of the intestine*

May help reduce the formation of gases to minimize bloating*

May decrease the reproduction of unwanted pathogenic bacteria in the intestines*

May help stimulate local immunity*
